Drawings

1. The drawings were received on June 26, 2003. These drawings are accepted by the Examiner.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest, enhancing two-dimensional contrast and range images rendered from three-dimensional streak tube imaging comprises modifying said second interim contrast image data to compensate for jitter and charge coupled device array effects associated with the STIL camera system, wherein first interim contrast image data is created, re-scaling said third interim contrast image data to said predetermined dynamic range, wherein fourth interim contrast image data is created normalizing said fourth interim contrast image data using an exponential decay function that describes contrast intensity roll-off associated with said fourth interim contrast image data, wherein fifth interim contrast image data is created, modifying said equalized range image data to compensated for jitter effects associated with the STIL camera system, wherein first interim range image data is created, applying a histogram clip routine to said fifth interim contrast image data and said third interim range image data, wherein enhanced contrast image data and enhanced range image data, respectively, are created; in combination into other features and elements of claims 1 and 9.

3. **Claims 1-16 are allowed.**

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Relevant Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Peters (U S 5,715,334) discloses digital pixel accurate intensity processing method for image information enhancement.

Kuroda et al (U S 5,681,112) disclose image enhancement.

Gindele (U S 6,985,637 B1) discloses method and apparatus of enhancing a digital image using multiple selected digital images.
